DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 7 and 12 – 16 are rejected under 35 U.S.C. 102(b) as being anticipated by GB Patent Application No. 2 327 565 (Byford).

Byford clearly teaches Applicants' device as claimed. See Page 2, line 22 – Page 3, line 22, page 5, lines 23 – 33, Page 6, line 19 – Page 7, line 21 and Page 8, line 32 – Page 9, line 23. See also the Figs. and claims of Byford.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 8 – 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Byford in view of U.S. Patent Application No. 2004/0002348 (Fraccaroli).

Byford teaches the claimed device except explicitly teaching the supplying of the position information based on prescribed criteria like location of another radio station or time or number. However, Fraccaroli teaches such at paragraphs 0039, 0049 (identity info = phone number) and 0054. It would have been obvious to one of ordinary skill in

Application/Control Number: 09/892,483

Art Unit: 2642

into the Byford device in order to protect privacy.

Claim 10 is further rejected under 35 U.S.C. 103(a) as being unpatentable over

the art to have incorporated such prescribed criteria restrictions as taught by Fraccaroli

Byford in view of WO 99/27746 (Kingdon et al.).

Byford teaches the claimed device except the supplying of position information

based on a phone number. However, Kingdon teaches that such is old in the art (see

page 5, lines 21 – 23). It would have been obvious to one of ordinary skill in the art to

have incorporated such prescribed criteria restrictions as taught by Kingdon et al. into

the Byford device in order to protect privacy.

Conclusion

The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure:

U.S. Patent No. 6,772,213 (Glorikian) - note Abstract; and

U.S. Patent No. 6,754,504 (Reed) – note Abstract.

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Bill Deane whose telephone number is (703) 306-5838.

In addition, facsimile transmissions should be directed to Bill Deane at facsimile number

(703) 872-9306.
